Ed,

Interesting that the Police Department would say that. DataMap built and continuously updates the Lakewood Police Department backend system. No one at the Police Department knows what goes into building the system.

Additionally, this data is used for continuous updates that DataMap preforms on behalf of the Township for the 2020 LUCA Census. I don't see how or why you would not want to send this data to me as I am a contractor for Lakewood Township.

Our system is built on formulas. All these data fields have been used in the past in some way or another. Not having this data will mess up a formula and not allow the system to return a positive result.

Charlie

I had checked with the police department and they said they do not need all that information, or that it was used on what you do for them. If you need the sales, tax and assessment information for other purposes that should be done as an OPRA request through the Clerk's office. Highlighted in red below is what the police department said they would need.

Sincerely,

Ed Seeger Jr., CTA
Lakewood Twp. Tax Assessor

Ed,

Can you please resend with all of the below fields.

They are all used in building formulas (such as sales date, when responding to a property and need to contact owner, the system may have old contact info and need to know of changes).

Ed,

The LPD uses an internal system called the Spillman Dispatch System. That system requires full tax information so that's what we provide. I tried several time to zero in exactly what is needed. The system is a proprietary system and you need a background check and police access to use. I was never given access to it. So the answer is, I deliver the below list plus many more fields. It has been working so far so I don't want to mess with it. Please provide the max that you can in a excel spreadsheet.

Thanks!

Is guess my question should be do they actually need all that info? I would just like to tailor it down to what the actually would be using. Taxes, assessment amounts and much of that info would seem to be info they wouldn't have a need or use for. I can provide most of it but not all. When I create the report I just want to make it as clean as possible. I understand they have been getting all this info but do they actually need all of it?

Subject: tax account information

Hi Ally,

I had a questions and perhaps you can lead me in the right direction.

Lakewood Township has on their website tax account information. I suppose that this may be the most up to date tax ownership data. I would like to integrate this data into the Police Department data that we create. We currently use ocnjtax data. I would suppose that there is a lag in what the Township has and what ocnjtax supplies.

Please let me know how I can go about obtaining this data.

Thanking you in advance,

Charlie
